

## Home Health Check Up

Every day, people live with hundreds, even thousands, of toxic chemicals in their homes, and they don't even know it! A Home Health Checkup will help you discover ways to rid your home of toxic chemicals and create a safer, healthier home environment.

Using this system, factors that may be compromising the safety of your home environment will be assessed and you will learn how to safely eliminate them.

### With your in-home consultation, you will receive:

- An assessment of household cleaning products, personal care items, and suggestions for healthier replacements
- A room-by-room evaluation designed to uncover potential hazards and concerns in every area of your home, including:
  - Carpeting
  - Furnishings and Fabrics
  - Renovation Materials
  - Basements and Attics
- A Results Report containing a comprehensive analysis of possible trouble areas
- Suggestions for products and non-toxic alternatives
- Contact information for outside service providers (if needed)

**Cost:** \$225

**Duration:** 1.5 – 2.5 hours (depending on size of house and number of family members)

**Location:** Your home

### Who needs a Home Health Checkup?

- Parents and expectant parents
- Allergy and asthma sufferers
- Pet owners
- Anyone who wants to live in a healthier, safer, Greener home!
